Celerity Technology Fiber Optic HDMI & Multiple Control Signals

Celerity Fiber Optic Gateway (FOG) is a breakthrough for high definition, long distance distribution of AV and control signals over fiber optic cable. HDMI, RS232, IR, 10/100BASE-T Ethernet and USB HID are supported up to 1000 feet over a single Celerity fiber optic cable. The combination of these functions in a sleek and slim component with fiber optic connectivity provides superior performance, bandwidth and flexibility for AV professionals to design and install high performance content and control signal distribution systems.

Supporting 4K @ 60Hz HDMI performance, Celerity FOG delivers 100% pure signal integrity from point to point at exceptional speed. HDMI for high definition video and multi-channel audio; IR transmission for remote control; RS232 for system control; USB HID for KVM and other interactive applications; Ethernet to enable web browsing on an HDTV from a computer; and IP system control can now all be supported with a single fiber optic cable and the Celerity FOG-TXCB and FOG-RXCB transmitter and receiver. Celerity FOG-TXCB and FOG-RXCB are sold separately.

Celerity Fiber Optic Gateway Cable – 2 Steps to Fiber Optic Control

The Celerity Fiber Optic Gateway Cable eliminates the time consuming and costly steps of fiber terminations. With Celerity FOG, only 2 steps are required – pre-wire and connect. Using the Celerity mini digital connector on each end of the fiber optic cable, a fast and secure connection is made to the FOG-TXCB and FOG-RXCB. This saves time and ensures that ensures a perfect fiber connection is always available. The Celerity Fiber Optic Gateway cable includes a small module at each end of the cable which supports the connection between the FOG components over the fiber. The small dimension of this module makes it easy to pull through conduit and concealed spaces. The Celerity Fiber Optic Gateway cable is plenum-rated to meet required safety specifications and building codes. The Celerity FOG Cable is available in lengths of 35' 40' 50' 60' 80' 100' 160' 200' 500' and 1000'. Custom lengths may be special-ordered. Celerity FOG cables are sold separately from the FOG-TXCB transmitter FOG-RXCB and receiver.

Slim and Sleek Component

In addition to the easily pre-wired cable solution, the Celerity Fiber Optic Gateway Control Box has been engineered specifically to assist installers in locating the FOG-CB wherever they need control system connections. Slightly more than .5" thin, each Celerity FOG-CB offers two mounting solutions for maximum flexibility in locating the boxes. Included with each FOG-CB are mounting flanges that securely snap onto the FOG-CB to provide mounting points for equipment racks, walls, cabinets or a variety of enclosures. For more discreet mounting, the FOG-CB is designed with two keyholes on the back to allow for installation on nearly any flat surface including directly behind a video display.

Included Items

Fiber Optic Gateway Transmitter (TX)

1 each:

- FOG-TXCB
- USB power cable (1.5m)
- USB-AC power adapter (5V/1A)
- IR emitter cable with 3.5mm plug (TS, 5V)
- IR receiver cable with 3.5mm plug (TRS, 5V)
- User guide

Fiber Optic Gateway Receiver (RX)

1 each:

- FOG-RXCB
- USB power cable (1.5m)
- USB-AC power adapter (5V/1A)
- IR emitter cable with 3.5mm plug (TS, 5V)
- IR receiver cable with 3.5mm plug (TRS, 5V)
