

An overhead photograph of five business professionals sitting around a large, light-colored wooden table. They are all focused on their mobile devices. From top-left to bottom-right: a woman in a purple top uses a smartphone; a woman in a blue sweater uses a smartphone; a man in a white shirt uses a laptop; a woman in a grey blazer uses a tablet displaying 'Statistics'; a man in a blue sweater uses a tablet displaying 'Progress'; and a man in a grey blazer uses a smartphone. The text 'BYOD Connectivity Solutions' is overlaid in the center in a large, white, sans-serif font.

BYOD Connectivity Solutions

USB-C, Display Port, Apple Lightning... Your presentation station offers a universal HDMI display input, but your presenters could be bringing a number of varying connections to the table. What connection should you offer to support BYOD technology? The answer is... *all of them!*

The DigitaLinx BYOD 'HUB' (BYOD-HUB-UT) Multi-Format Video Converter

DigitaLinx BYOD Connection Hub (BYOD-HUB-UT)

Perfect For:

- Conference Rooms - Sleek, Simple Design
- Less Clutter: Easily Hides / Mounts Under a Conference Table
