# About us

Colorbeam, a wellness and lifestyle lighting company delivers a revolutionary low voltage lighting system that offers a better lighting experience, enhances lives and drives health benefits while creating more productive, appealing and dynamic space in residential, commercial and hospitality settings.

Lighting plays such a key role in driving beauty and functionality to space that Colorbeam's unique and revolutionary lighting solution will benefit customers, specifiers, designers and architects seeking the perfect lighting solution that will maximize the enhancement of the space.

# Colorbeam lighting manifesto

IMAGINE A WORLD WHERE THE LIGHT WAS ALWAYS JUST RIGHT.  
WHERE EVERY INDOOR SPACE COULD CAPTURE THE NATURAL GLOW OF NATURE,  
WAKING YOU IN THE MORNING LIKE AN ENERGIZING SUNRISE  
AND SOOTHING YOU IN THE EVENING LIKE THE PERFECT SUNSET.

For us, the right light is about more than illuminating a space. It sets the mood to your life. It changes how you see the world. It can lift your spirits and restore your sense of wellbeing, Helping you live, work, share, entertain, celebrate and create.

At Colorbeam, we believe that for every space, there's a light that's just right. We understand that being well starts with seeing well and that the brightest ideas come when our senses and surroundings are aligned. We believe in staying light years ahead of the competition. We see where innovation and creativity come together for brilliant results.

We know that the right light changes everything—  
And that's why we'll never stop bringing colorful imagination to light.

# Colorbeam... It's what you can do with the light

Although Fixture aesthetics remain an important part of the selection process Colorbeam offers more. As we enter the digital age of lighting it's no longer on/off/dim. It's what you can do with the light and Colorbeam is truly the innovative leader in delivering endless possibilities.

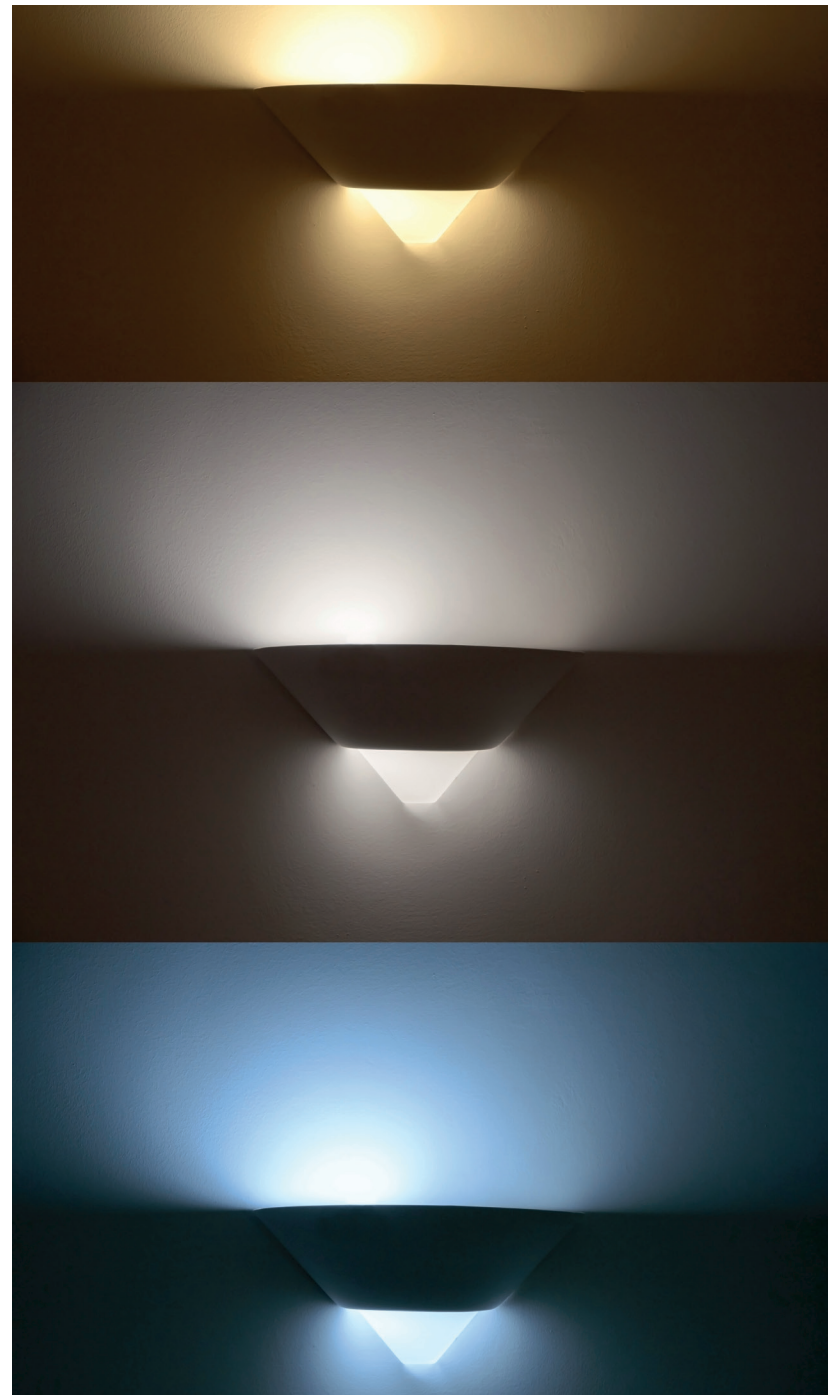

T SERIES 9W RGB

# The right light for all occasions

Mood/scene settings and proper task lighting has never been easier. Colorbeam's revolutionary ability to tune light to any temperature ( 1700 k - 6500 k ) at 95+ CRI and deliver colored lighting assures the perfect light at a touch of a button.

Cool white light will energize you in the morning, daylight temperature will drive productivity and a warm white light will comfortably settle you into night time mode. At a touch of a button select colored lighting scenes and create memorable evenings when entertaining family and friends.

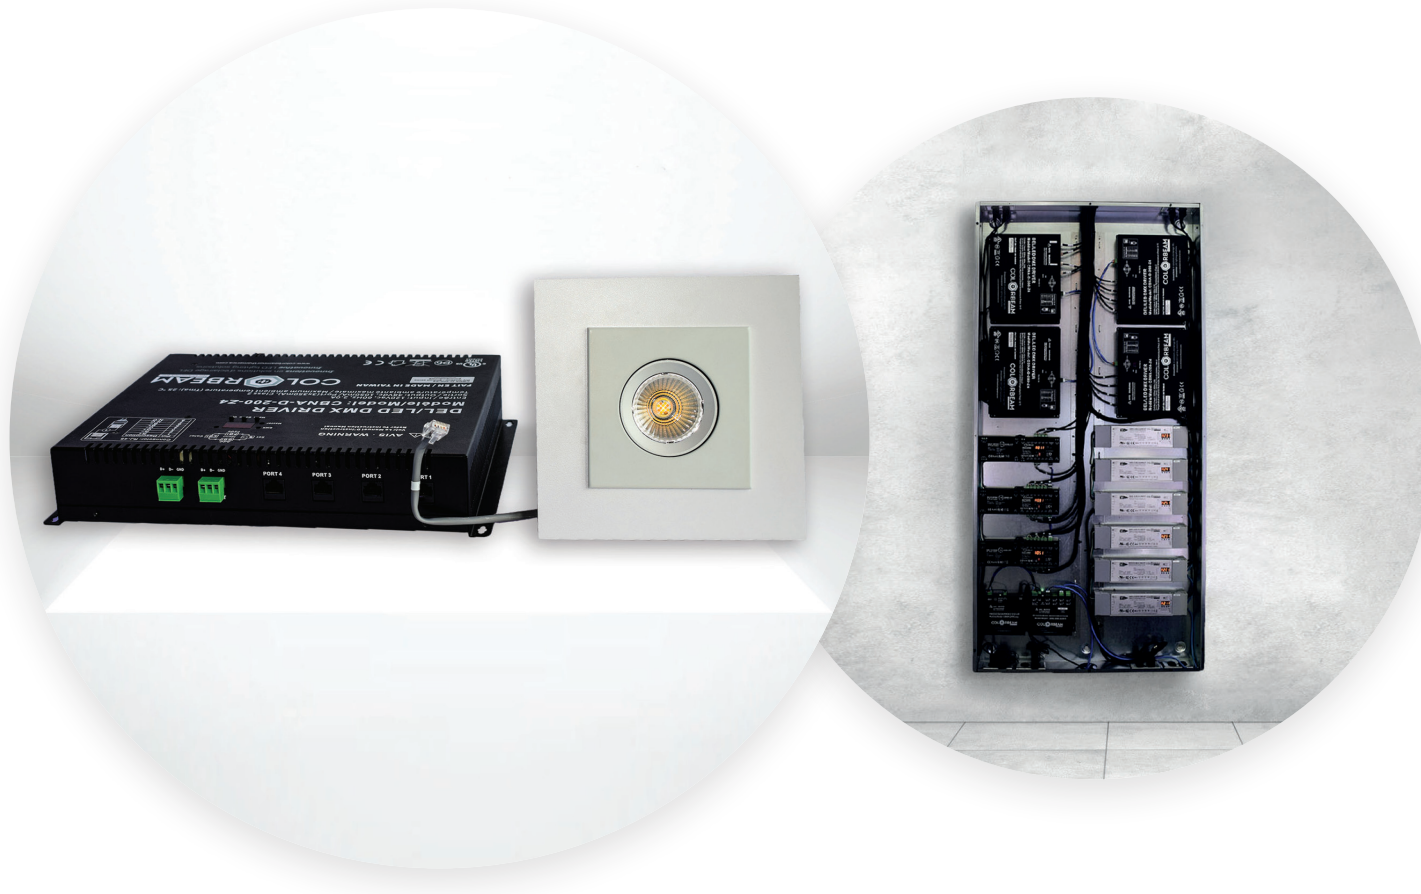

## COLORBEAM'S INNOVATIVE, PROPRIETARY TECHNOLOGY DRIVES BEAUTY AND SIMPLICITY IN LIGHTING

### Low voltage

Gone are the days of high voltage and traditional romex wire requirements. The emergence of LED technology and its minimal power requirements allow power and control over a single network cable ( CAT cable ) driving a smarter and more energy efficient lighting solution. Cost effective and easier to install, delivers a positive impact on our carbon footprint and offers unmatched flexibility, features and benefits.

COLORBEAM'S PATENT PENDING GATEWAY PROCESSOR DRIVES TUNABILITY, COLOR, EASE OF 3<sup>RD</sup> PARTY CONTROL INTEGRATION AND FLAWLESS DIMMING.

## Tunability

Pioneers in tunability, mood and scene settings and proper task lighting has never been easier. Colorbeam's revolutionary ability to tune light to any temperature (1700 k - 6500 k) at a press of a button or automatically over the course of a 24 hour cycle, CIRCADIAN rhythm and human centric lighting becomes part of your lifestyle.

As medical research continues to prove that sleep patterns, mood and general health are linked to the lighting we are exposed to, Colorbeam's ability to mimic the sun's natural light will continue to play a key role in enhancing our customers overall health.

## RGB/Color

Color plays a key role in space enhancement and Colorbeam lighting offers the ability to create memorable experiences for family and friends. It also offers the ability to transform space in hospitality environments that drive an enhanced customer experience. Gatherings, family events, dinner parties and public spaces will never be the same with Colorbeam lighting.

## Controllability and dimming

Features and benefits drive Colorbeam lighting differentiators and key to making Colorbeam the revolutionary, market leading low voltage lighting solution is our patent pending GATEway processor. Lighting has become digital and our ability to deliver flawless, flicker free dimming curves, simplicity in control and compatibility to 3<sup>rd</sup> party lighting control manufacturers is central in making Colorbeam lighting the right choice for customers, designers, specifiers and architects.

COLORBEAM, ONE LIGHTING COMPANY, ONE SYSTEM, ENDLESS POSSIBILITIES

## Indoor lighting

Colorbeam's wide selection of recessed tunable white and RGB fixtures meet upscale design requirements, commercial and hospitality needs while delivering unmatched features and benefits. Our selection of fixtures offers various sizes, trim selections, colors, finishes, trim and trimless options, lumen output and 95+ CRI.

V SERIES 36W RGB

# Hospitality lighting

Complement any space with Colorbeam's wide array of hospitality lighting solutions such as tunable, dimmable, white/RGBW tape light options, tracks, diffusers and other decorative lighting options.

VENUS SUPER SLIM  
PROFILE FIXTURE

## Landscape lighting

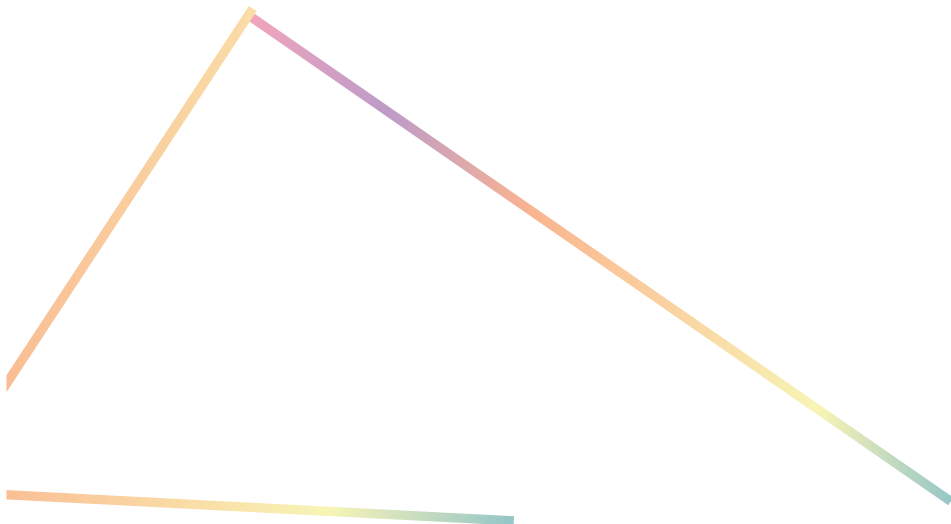

Outdoor and backyard space is quickly becoming an important extension of the home. As a multitude of entertainment equipment designed and manufactured for outdoor use floods the market, enhancing the setting with lighting that will truly transform the space will give family, friends and customers memorable times.

Get the wow factor with our wide selection of linear bars, flood lights, spot lights, pathway lights, tape light and more.

# Outdoor building illumination

Bring attention to your home, building or business and drive traffic your way. Use light as a powerful marketing tool to brand your space in your corporate colors. Our array of outdoor lighting fixtures turn brick and mortar into works of art at night.

# Why Colorbeam

“Over the course of the last few years, 3 Brewers Restaurant Group has standardized on Colorbeam’s innovative lighting solution for all renovated and new build locations. The solution offers dynamic lighting options and features, reliability and ease of use for our staff. The solution has been at the core of our restaurant branding strategy as we continue to strive to offer our customers a great dining and visual experience.”

**3 BREWERS RESTAURANT GROUP**

Mike C., Head of Development

"I would like to commend you and your staff at Colorbeam Lighting for your excellent work providing us with superior LED fixtures and lighting design services. Your commitment to Eagle Sentry and our residential channel has provided us with the ability to grow our low voltage integration business into an entirely new category. This has allowed us to expand our revenue stream and maximize our dollars per project.

Colorbeam's cat6 based color changing LED fixtures have created a new level of excitement with our clients, builders, architects and interior designers. The response to our Colorbeam showroom has also exceeded our expectations.

We look forward to our continued relationship and future Colorbeam projects.."
