

IS YOUR COLLABORATION ROOM...OFFLINE?

CXDetect enables you to offer proactive managed services for AV/UC spaces at work and in the home.

Liberty AV offers CXDetect for the AV industry. Our cloud-based SaaS platform was strategically created for the AV/UC space, providing self-healing, analytics, and the ability to manage multiple vendor-related UC software and hardware devices all at the same time from one dashboard. CXDetect is tailor-made to support your customers' technology needs.

Partnering with a managed services provider like us gives you the peace of mind of knowing that your AV/UC infrastructure is up and running.
