Summary: Initial Release Gate 0

Version Number: Version 1 .0
Owner: Rob Westwood and Clive Sawkins
Date: 26-11-2020
Summary: Updated for minor changes – Approved for Release

1.0 Summary:
Firmware Release Notes 2-1-10-XXX

As part of our ongoing support for the iR37 we are pleased to release the updated
Firmware version 2-1-10-XXX.

Based on user feedback following the launch in early 2020 we have continued to develop the unit.

The upgrade adds two key new features:

• Lower Temperature Adjustment.

• Emails for every scan or only over the pre-set temperature alerts.

The upgrade is available from the following locations:

https://www.dropbox.com/sh/aoql7f2gowzr932/AABqFybo3YUpVNvoCcFNxM_
Aa?dl=0&preview=FirmwareNovember2020.zip

If you purchased your iR37 from Liberty AV and the unit has been registered, then use the following site:

https://libertyav.dial.vc/document/233/This%20is%20the%20link%20and%20instructions%20for%20the%20
firmware%202-1-10%20upgrade%20for%20iR37.pdf

All installed units in the field can support this firmware update; there are zero hardware limitations with
this upgrade. The unit can be updated by accessing the software at the management platform or by using a
USB stick and the USB port on the base of the iR37.

2.0 Firmware Upgrade Instructions

1. Download the "FirmwareNovember2020.zip" file (zip) to a local directory

2. Unzip the file ONCE

3. This will create one sub-directory (ir37Firmware2-1-10xxx) which contains an .apk and an "upgrade.zip" file

4. DO NOT unzip this upgrade.zip file

Upgrade your iR37 by software network link

1. Open your software

2. Go to the "firmware" tab

3. Enter the IP address of a device

4. Click the "sdk" button

5. Navigate to the above "upgrade.zip" file

6. Click send

Firmware will autoload and then reboot device will take 2-3 minutes

Repeat steps 3 to 6 above for each device

Or

Upgrade your iR37 manually using a USB stick

1. Copy the "upgrade.zip" file to the USB stick

2. With the iR37 already powered. Plug in the USB to the iR37

3. Device will guide you through an upload process; do not remove USB. Wait until device fully reboots for 2-3 minutes. Remove USB stick

Thank you for your purchase.
