

USB CAMx Webcam FW Update

NOTES:

- If you plan on upgrading your Liberty CAMx, check the version information, model, and other equipment required before starting.
- Make sure to connect to a laptop or PC via a USB cable.
- If multiple CAMx cameras are connected to the host, please make sure to connect one at a time.
- When upgrading the camera, power off the camera or disconnect and/or touch the USB cable.

STEPS:

- 1. Connect Web Camera to your PC over USB cable
- **2.** Unzip the software package and open
- 3. Make sure the software recognizes the camera as shown below *CAM90 or CAM120
- **4.** Find the "Type" section and select "MTD" using the drop-down menu

5. Click on the "Load File" button
