

Extending USB Signals Comparison Table

Liberty's USB Point-to-Point Signal Extension

www.libav.com 800-530-8998

Liberty AV offers high-grade USB extenders that provide a simple and flexible solution for any USB application, including education, commercial, and medical. Go beyond the 5-meter limitation only using one category cable, providing you the ability to extend USB peripherals 10+ meters away from the host computer. We make it easier to connect and extend various USB peripherals to your laptop or personal computer (such as web cameras, microphones, cable cards, and disk drives). Truly plug-and-play; no driver is required when extending devices to use with software platforms such as Zoom, Teams, YouTube, FaceTime, and other messaging applications.
