## Liberty Expands upon Intelix Digital Presenter Line

*DIGI-P51 HDMI/VGA auto-switching scaler with microphone input and analog audio input and output*

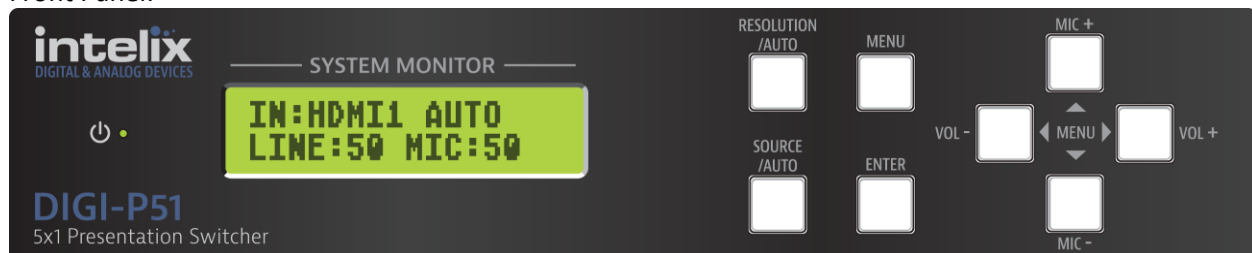

COLORADO SPRINGS, Colorado—January 20, 2015—Liberty AV Solutions announced the latest Intelix switching scaler product, DIGI-P51. This device is designed to add video switching, scaling, and audio processing to classrooms, training rooms and meeting areas, especially where under table installation is desired.

The new DIGI-P51 is a multi-format switching scaler with three HDMI and two VGA video inputs. This switcher scaler provides microphone and line level mixing plus, analog audio embedding, and analog line level output. The DIGI-P51 features an HDMI output that is scaled to one of seven output resolutions: 1024x768, 1280x720 (720p), 1280x800, 1360x768, 1600x1200, 1920x1080 (1080p), and 1920x1200.

The DIGI-P51 features a convenient auto-switching feature to automatically switch between HDMI and VGA sources. Additional control options for the new digital presenter include front panel push buttons, IR, and RS232. Using integrated CEC commands, HDMI sources with CEC enabled can be controlled through the DIGI-P52 via IR or RS232.

The DIGI-P51 is expected to be available February 2015 from authorized Liberty AV Solutions/Intelix dealers across North America.
