Liberty AV Solutions Releases Intelix HDMI Audio Decoder

HDMI surround sound decoder simplifies complex HDMI audio installations.

COLORADO SPRINGS, Colorado—March 2, 2015—Liberty AV Solutions released a new HDMI audio decoder: the Intelix DIGI-HDAC. The DIGI-HDAC was designed for use in installations where a digital or multichannel audio source is being sent to a device that does not support multichannel audio or requires analog audio.

The DIGI-HDAC features a 4Kx2K compatible HDMI input with surround sound support for up to six channel audio. The HDMI output will pass the original video signal and a down-mixed stereo audio version of the original digital audio signal. The DIGI-HDAC will also simultaneously output the audio to the 3.5mm jack and the stereo RCA jacks.

The DIGI-HDAC is in stock and now shipping from authorized Liberty AV Solutions/Intelix dealers across North America.
