Liberty Adds HDMI Auto-Switcher to DigitaLinx Brand

DL-S41 HDMI auto-switcher supports 3D and 4K video.

COLORADO SPRINGS, Colorado—March 5, 2015—Liberty AV Solutions announced the latest DigitaLinx auto-switching product, DL-S41. This device is designed to add cost-effective automatic video switching to home theaters, classrooms, training rooms and meeting areas.

The new DL-S41 is a small format auto-switcher with four HDMI video inputs and one HDMI output. This switcher supports HDMI video resolutions up to 4K (3840x2160) at 30 Hz, 1080p 3D, and multichannel audio. In addition to passing EDID information from the display, there are multiple built-in EDID settings to simplify an installation. The DL-S41 will de-embed digital stereo audio to provide an analog audio source for an existing audio system. This switcher also features audio return channel (ARC) support through the analog audio output.

When in auto-switch mode, the DL-S41 will switch to an HDMI input as soon as a new source is connected. When the active source is removed, the switcher will select the first source on the lowest numbered input. The DL-S41 may also be controlled via RS232, IR with the included remote, or from the source button on the front of the switcher.

The DL-S41 is expected to be available Q2 2015 from authorized Liberty AV Solutions dealers across North America.
