POWER TO THE PEOPLE

Liberty AV to show power relocation and cable conceal kit at CEDIA 2010

ATLANTA, GA, September 23, 2010—Items on display in the Liberty AV booth (#2318) at this year's CEDIA Expo will include the Colorado Springs, Colorado-based company's PowerBridge in-wall power outlet relocation and cable conceal kit.

Effective, time-saving, and affordable, the PowerBridge system is designed to manage AV power in/out requirements and provide discreet cable management. Combining the PowerBridge Solution with TrippLite Power Protection provides a great way to protect projectors and lamps, and any other expensive AV electronics that are not installed in a rack.

Utilizing one-inch recessed wall plates on both ends of the power in/out chain to facilitate close-mounting of flat-panel TVs and other components, a PowerBridge network plugs into existing power outlets or surge protectors to eliminate the need for direct wiring to a dedicated electrical circuit. Neatly concealing all wires and cables out-of-sight behind the wall, the system also includes pass-through cable management receptacles with built-in mud rings.

In-wall power junction boxes further complement the package that install in standard 2x4 or 2x6 construction walls. Employing a design made expressly for use with PowerBridge recessed wall plates, the junction boxes isolate power wires from AV cables and come complete with an easy-to-use installation template. A six-foot power cord is additionally included with each kit that plugs into an existing power outlet on one end, and PowerBridge's power-in receptacle on the other. Power-in receptacles can be installed up to 75 feet away from a power-out receptacle with the use of additional power connect cabling.

ETL listed and conforming to UL STD 514C, the PowerBridge system is also certified to Canadian CSA STD C22.2 NO.42.1.

About Liberty AV Solutions (formerly Liberty Wire & Cable)

Liberty AV Solutions is recognized as a leading contract manufacturer of AV integration products. They are also positioned to be at the leading edge in digital solutions. Liberty's headquarters is in Colorado Springs, Colorado. Liberty's distribution offices are located in Colorado, Arizona, North Carolina, Hawaii and Europe. Liberty remains focused on customer service and education while continuing to provide the broadest range of professional AV products available. Liberty AV Solutions is a subsidiary of Communications Supply Corporation, which is owned by WESCO International, Inc., a publicly-traded Fortune 500 holding company headquartered in Pittsburgh, Pennsylvania.
