Each Intelix M Series matrix marries the superb audio quality of an analog signal with voltage-controlled attenuators for precise, flexible program distribution.

M Series utilizes a revolutionary command structure allowing multiple complex actions to be initiated with a single, simple command, and distributed central processing units allow even the largest matrix configuration to change presets in milliseconds.

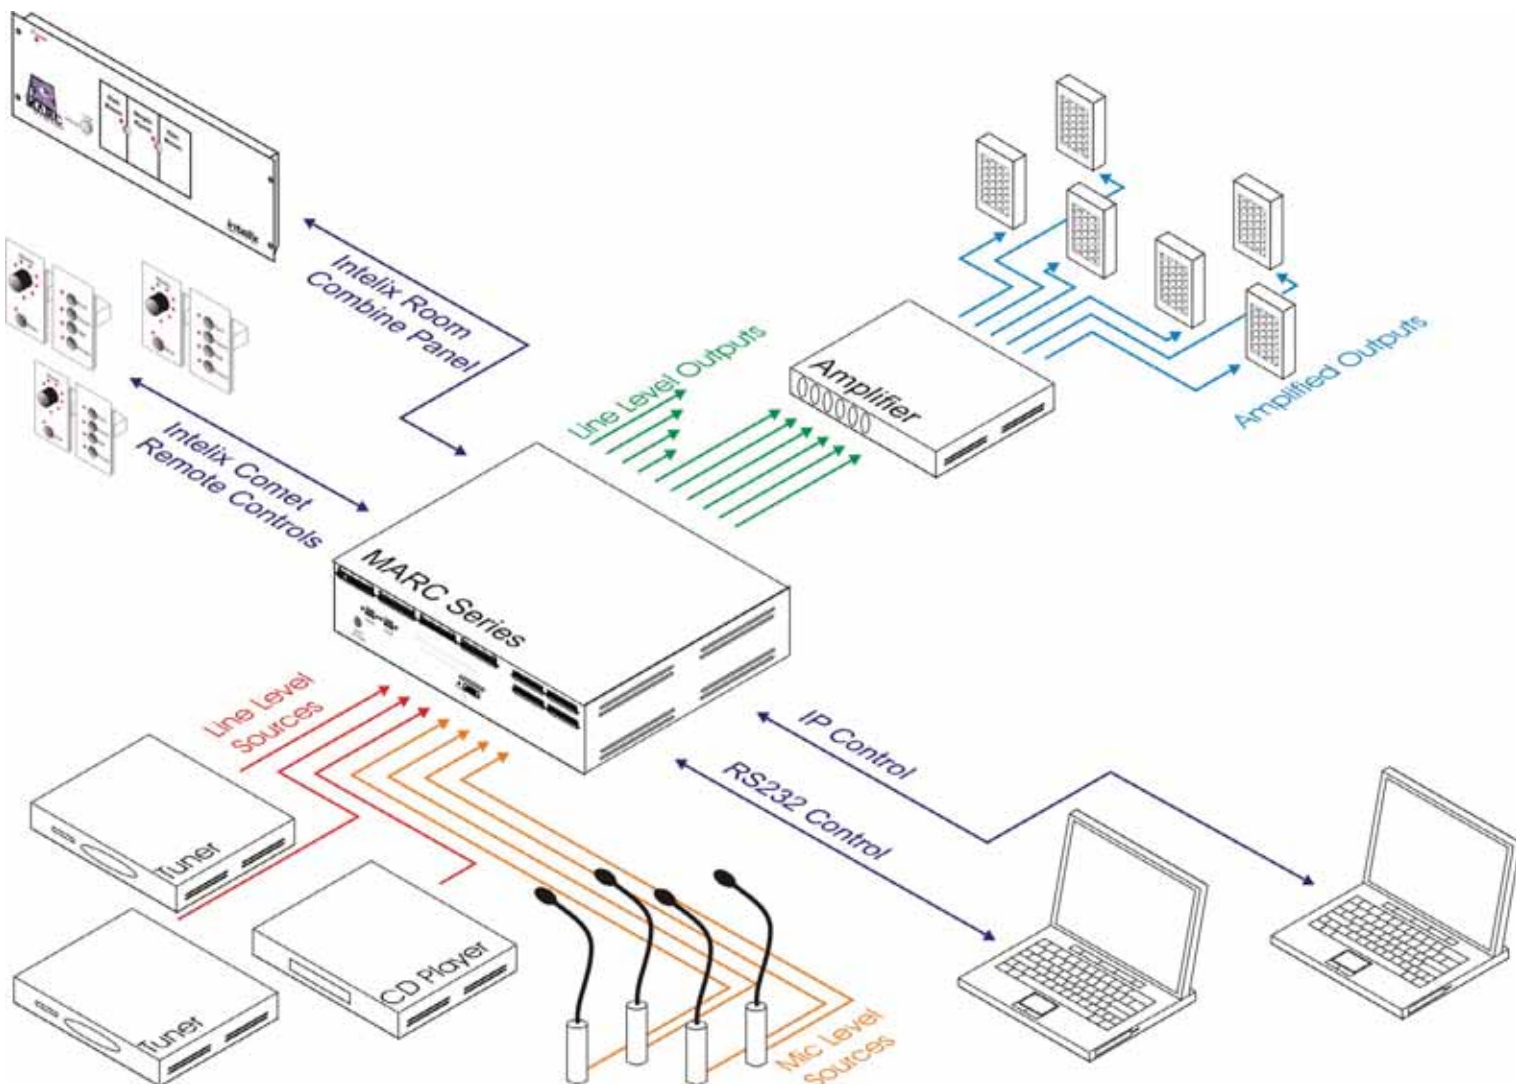

**Design with Intelix and design with intelligence.**

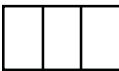

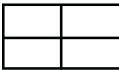

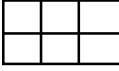

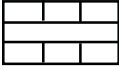

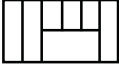

The Intelix MARC Room Combine System is designed specifically for applications with moveable walls, including hotels, convention centers, conference centers, houses of worship, and multi-use facilities. MARC allows you to design, program, and install your sophisticated room combine system in a fraction of the time it would take with other solutions.

The secret is in MARC's embedded logic--all of the logic for routing inputs to outputs, combining and separating rooms, incorporating paging, and managing remote controls is pre-programmed. Plus, the MARC system is flexible enough to allow RS232 and ethernet control, automatic wall sensors, custom room topologies, and custom remote controls. **Let MARC be your complete room combine package!**

## AVM System Hardware

**AVM Series Matrix Audio Mixer/Video Switcher** (*part numbers vary*). The rack-mounted AVM matrix provides both audio mixing and video switching in a single package. Since the AVM features true audio matrix mixing, any audio input may be routed to any audio output—regardless if it is tied to a video source or not. Available audio matrix sizes include (inputs x outputs): 8x8, 16x8, 24x8, 32x8, 8x16, and 16x16. Available video sizes include (physical inputs x physical outputs): 8x8, 16x16, 32x32, and 48x48. AVM supports up to 64 presets.

**Factory-Installed Mic/Line Preamplification Card** (*Mic/Line Card*). The factory-installed Intelix mic/line card provides +15V phantom power and up to 60 dB of gain for eight AVM audio input channels (specify one mic/line card per every eight inputs which require preamplification). One mic/line card is included with every AVM matrix purchase.
